The campus engagement surrounding the Huron Consulting Group began in March 2011.

The Governance structure includes a Steering Committee and an Advisory Committee. Working groups will be formed later as needed.

We’re waiting for approval regarding the Guiding Principles.

There are three areas of initial review in Phase I:

- Strategic sourcing
- Informational technology
- Functional area assessments (facilities, business services, etc.)

As Huron studies each area, it follows the same general methodology:

- Establish a plan and timeline
- Interview staff
- Gather and analyze data
- Identify areas of greatest opportunity for improvement
- Share recommendations with the campus
- Draft business cases for specific projects
- Set priorities with campus decision-makers and draft charters
