| **Email & Calendaring**                                        | • A third-party risk assessment of the project was conducted in December 2013. The project sponsors requested that the implementation be slowed to allow for appropriate evaluation and planning to respond to the concerns raised in the risk assessment.  
  • The business owner has prepared recommendations in response to the concerns, and is again moving forward with the Office 365 implementation.  
  • An external project manager has been retained to oversee the ongoing implementation. |             |
| **Data Center Aggregation**                                    | • This project has been completed and transitioned to the business owner for implementation. The new data infrastructure service will be operated within DoIT. The service has a new governance structure and reports to the CIO’s office. |             |
| **Instructional Space Utilization**                            | • The sponsors accepted the Inventory Data Team’s report on January 30, concluding the planning phase of work.  
  • The business owner has now made the data available to campus via the space management web site.  
  College of Engineering Pilot Development:  
  • The team modeled scenarios to explore and measure utilization improvement rates.  
  • The team has delivered their recommendations and final report to the project sponsors. |             |
